

THE AVALANCHE HAZARD WILL BE LOW**Avalanche Hazard Forecast for Thursday 10/01/2019****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

At summit levels and on all aspects, a light covering of thawing snow will persist through the day. Amounts will not be significant. The avalanche hazard will be Low.

**Forecast Weather Influences**

Patchy light rain and drizzle at all levels will persist overnight, easing by daybreak to give a cloudy day with hill fog and the occasional outbreak of drizzle, possibly wintry on the highest summits. During the day, the freezing level will hover around the summits and the moderate, generally Westerly wind will freshen.

Comments

The thawing and shallow snow cover will continue to diminish over the next two days as the mild conditions persist.
