

Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Mon 11/02/2019 TO 18:00HRS Tue 12/02/2019

Hazard Level	Avalanche Probability
Very High	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
High	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
Considerable	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
Moderate	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
Low	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

Forecast Weather Influences

Rain preceded by some overnight sleety snow. Much milder with the freezing level rising to over 2000m by the end of the afternoon. Strong South West winds.

Forecast Snow Stability and Avalanche Hazard

Wet snow instability expected as much milder and wet weather becomes established from the early hours onwards. Most affected locations will be very steep North through East to South East aspects above 900m. Some of these places will be overhung by wet, weakening and collapse prone cornices. The avalanche hazard will be Considerable

Observed Avalanche Hazard - Mon 11/02/2019

Observed Weather Influences

A little overnight fresh snow then dry, bright and cold for the rest of the day. Winds have been light variable but became fresh Westerly by afternoon.

Observed Snow Stability and Avalanche Hazard

Good stability in all locations below 850m. Localised accumulations of marginally bonded windslab lie on steeper North through East to South East aspects above 950m. Instability here is variable but both old and newer surface snow layers fractured readily when tested. Small to moderate cornices overhang some very steep lee slopes and gullies. The avalanche hazard is Moderate

Mountain Conditions

Observed Mountain Travel Conditions

Breakable crust at all levels, very tiring conditions Cold clear conditions Winds approx 10 - 20 mph fresh, cooling etc

Comments

Poor mountain conditions expected throughout Tuesday.
