

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 01/03/2019

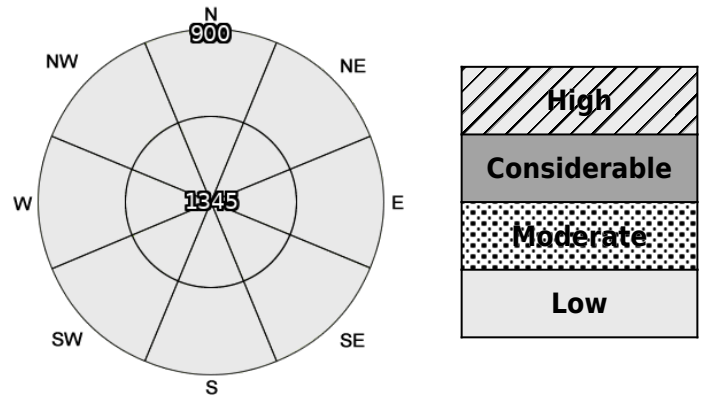

Avalanche Problems

Wet Snow

Forecast Snow Stability & Avalanche Hazard

The remaining snowpack, which lies mainly on North to East aspects above 900 metres, will continue to slowly thaw. Stability will be generally good. The avalanche hazard will be Low.

Forecast Weather Influences

It is expected to remain dry, with the freezing level above the summits. Winds will be generally Southerly; very light at first, increasing gradually to moderate.

Comments

It looks like the weekend will be a bit more wintry than of late.
