

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 09/03/2019

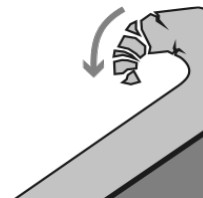

Avalanche Problems

Wind Slab

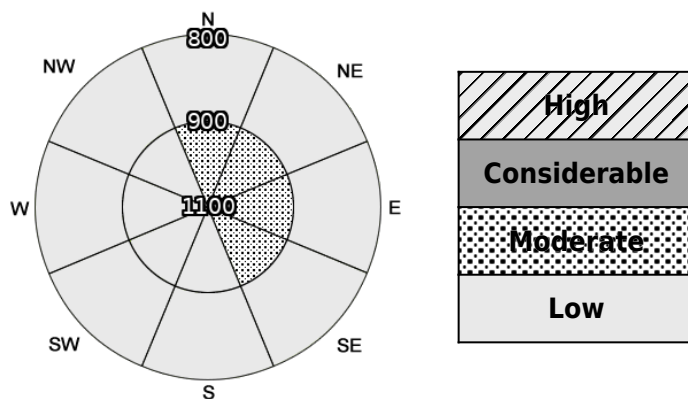

Persistent Weak Layers

Cornices

Forecast Snow Stability & Avalanche Hazard

Weaker, marginally bonded windslab will build and become more extensive on very steep North through East to South East aspects above 900 metres. New cornice development expected above very steep coire backwalls and gully tops of the same aspects. Better stability on ridges and recently wind scoured areas. The avalanche hazard will be Moderate.

Forecast Weather Influences

Snow showers throughout but heavier overnight. Strong Westerly winds. Becoming much colder.

Comments

Wintry looking forecast for Saturday and Sunday.
