

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Wednesday 20/03/2019

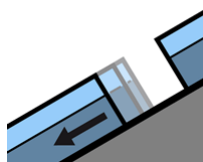

Avalanche Problems

Wet Snow

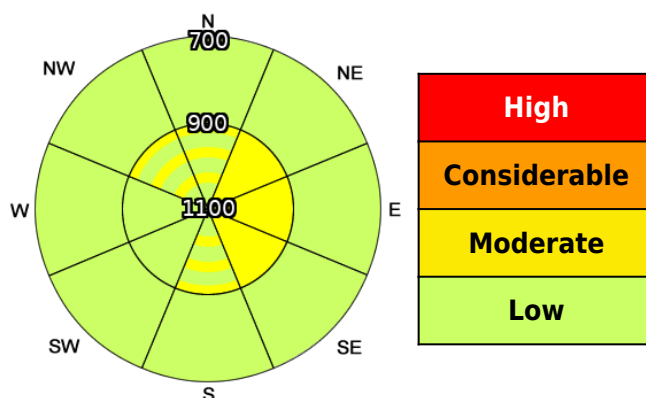

Cornices

Gliding Snow

Forecast Snow Stability & Avalanche Hazard

Some limited wet snow instability on very steep North to South-East aspects above 900m. Cornices will continue to weaken and threaten to collapse on to slopes of these aspects. Wet snow slides possible from very steeply inclined benches and ledges of the Post Face in Coire Ardair. Most snow below 800m on less steep slopes will begin a more pronounced consolidating trend. The avalanche hazard will be Moderate

Forecast Weather Influences

Staying mild with some light rainfall. Freezing well above summits.

Comments

Weak cornices. Also watch out for snow slides off benches and ledges on the Post Face during the thaw.
