

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Wednesday 10/04/2019

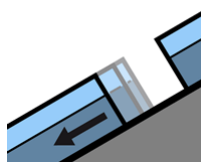

Avalanche Problems

Wet Snow

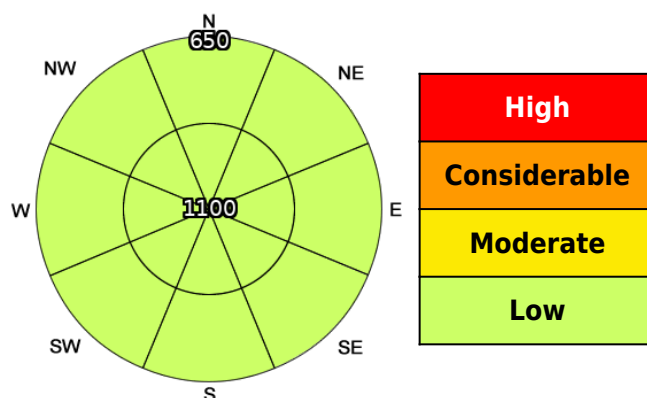

Cornices

Gliding Snow

Forecast Snow Stability & Avalanche Hazard

The surface of the snowpack will refreeze in all locations overnight. Sun exposed slopes will soften later in the day; shaded locations will maintain a firmer snow surface. Good stability in most locations. Minor full depth snow slides possible on the Post Face of Coire Ardair later. Falling ice and rocks also a consideration as temperatures rise. The avalanche hazard will be Low

Forecast Weather Influences

Dry. An overnight frost at most altitudes then sunny and warm during the day. Very light winds.

Comments

Wednesday looking scorchio.
