

THE AVALANCHE HAZARD WILL BE LOW**Avalanche Hazard Forecast for Saturday 13/04/2019****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

Overall stability will be good with the patchy snow cover remaining firm and well bonded throughout. Some minor surface instabilities are possible on steep slopes which are exposed to the sun. Greatest amounts of snow are to be found in well defined corries above 900 metres. The avalanche hazard will be Low.

**Forecast Weather Influences**

It will be a dry day with the freezing level around 800 metres. Winds will be strong from the South-East.

Comments

The snowpack is very firm, particularly where shaded from the sun. Potentially serious run-outs.
