

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 14/04/2019

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain generally well bonded and stable. The surface of the snowpack will freeze at all levels and on all aspects overnight. During the day there may be some softening of the snow surface where it is exposed to the effects of solar radiation, but on shaded slopes it will remain frozen. The avalanche hazard will be Low.

Forecast Weather Influences

Frost at all levels overnight; the freezing level is expected to rise to around 850 metres during the day. It will remain dry, with strong South-Easterly winds.
