Glencoe

Avalanche Hazard Forecast

Issued 24/12/2019

FOR PERIOD 18:00HRS Tue 24/12/2019 TO 18:00HRS Wed 25/12/2019

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Wednesday 25/12/2019

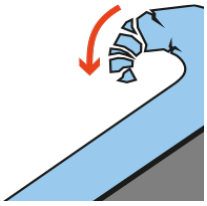

Avalanche Problems

Wind Slab

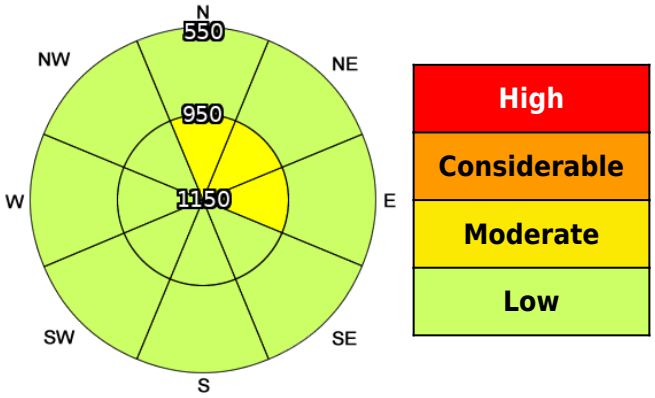

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The moist snowpack will start to consolidate. However, localised deposits of moderately bonded windslab will persist mainly on steep North to East aspects above 950 metres, gully tops, scarp slopes are mostly affected. Cornices above similar aspects are weak and unstable. Elsewhere the snowpack will be moist but generally well bonded. The avalanche hazard will be Moderate.

Forecast Weather Influences

A ridge of high pressure is building over Scotland which will bring mainly dry and settled conditions on Christmas Day. Freezing level will be around 1000 metres. Winds will be fresh from a West-South-Westerly direction.

Comments

**** Merry Christmas ****
