Glencoe

Avalanche Hazard Forecast

Issued 18/01/2020

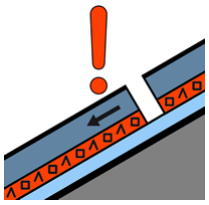
FOR PERIOD 18:00HRS Sat 18/01/2020 TO 18:00HRS Sun 19/01/2020

THE AVALANCHE HAZARD WILL BE MODERATE

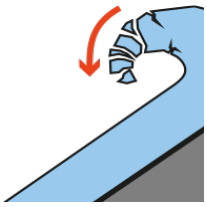
Avalanche Hazard Forecast for Sunday 19/01/2020

Avalanche Problems

Wind Slab



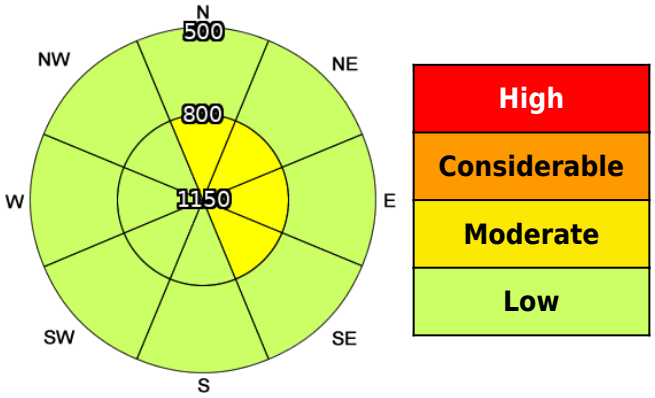
Persistent Weak Layers



Cornices

Forecast Snow Stability & Avalanche Hazard

Unstable windslab will persist, and continue to build through redistribution, mainly on North through East to South-East aspects above 800 metres. Deeper accumulations will be localised and mainly found in steep wind sheltered locations such as gullies, corrie rims and ridge flanks. Fragile cornices will be present above these aspects. The older snowpack will be frozen and stable. The avalanche hazard will be Moderate.



Forecast Weather Influences

Moderate West-South-West winds backing South-Westerly overnight and become strong during the day. A dry day is expected. The freezing level will be around 800 metres.

Comments

Warming up on Sunday night and then staying mild for a few days.
