Glencoe

Avalanche Hazard Forecast

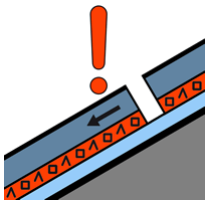

Issued 22/01/2020

FOR PERIOD 18:00HRS Wed 22/01/2020 TO 18:00HRS Thu 23/01/2020

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 23/01/2020

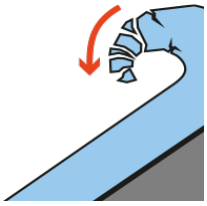

Avalanche Problems

Persistent Weak Layers

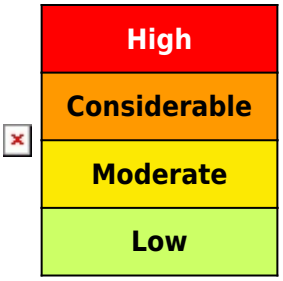

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

Little charge to the moist, receding snowpack which will continue to thaw in the mild conditions. Localised wet snow instabilities will persist mainly on very steep North through to East aspects above 900 metres. Elsewhere the snowpack will be generally stable. Remaining cornices will be prone to collapse. The avalanche hazard will be Low

Forecast Weather Influences

Mild conditions will continue to affect the area through the period with the freezing level well above the summits. Largely cloudy conditions with spells of drizzle in the afternoon. Winds will be strong West-South-Westerlies.

Comments

Looking ahead: Colder, clear and largely dry through the day on Friday with moderate or fresh South-Westerly winds and freezing levels falling to 600-800m.
