Glencoe

Avalanche Hazard Forecast

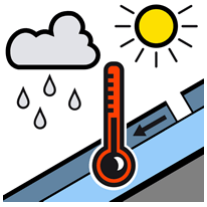

Issued 05/02/2020

FOR PERIOD 18:00HRS Wed 05/02/2020 TO 18:00HRS Thu 06/02/2020

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 06/02/2020

Avalanche Problems

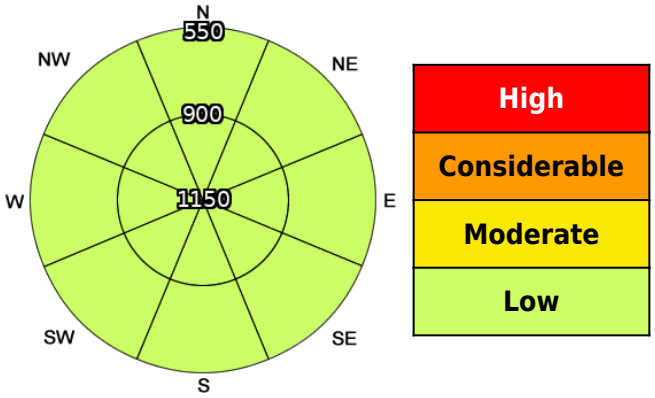

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

Little change is expected. The snowpack will continue to slowly thaw and consolidate and stability will remain generally good. Pockets of localised instabilities will persist on steep North to Easterly aspects mainly above 900 metres. Places such as coire rims, gully exits and ridge flanks above 900 metres will be particularly affected. Cornices becoming wet and unstable. The avalanche hazard will be Low.

Forecast Weather Influences

The ridge of high pressure will maintain mostly dry conditions. The freezing level will be well above the summits. Strong Westerly winds will ease and back becoming Southerly.

Comments

More changeable weather arriving over the week-end with very strong winds on Sunday.
