

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 21/03/2020

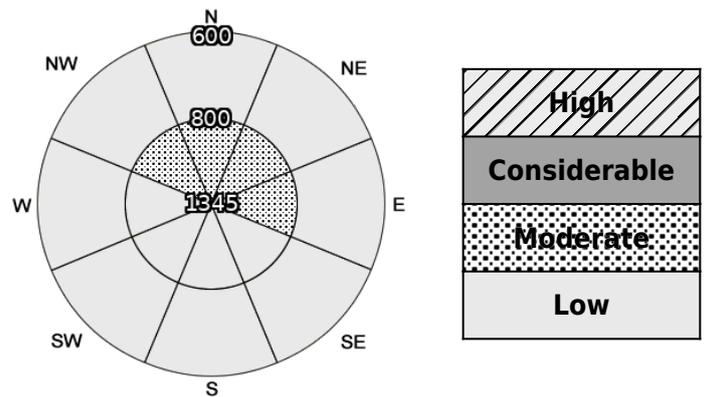

Avalanche Problems

Persistent Weak Layers

Forecast Snow Stability & Avalanche Hazard

Little change is expected in the snowpack. Some dry snow instabilities will remain on steep shady North-West through North to East aspects above 800 metres. Large potentially unstable cornices overhang these areas. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will be another dry day with strengthening South-Easterly winds. After a cool night the freezing level will rise to around 800 metres through the day.

Comments

Weather over the next few days expected to remain dry but for the wind to strengthen. Little change expected in snowpack conditions.
