

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 12/12/2020

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Good stability in most locations. Only limited and thin new windslab expected on steep N to E aspects above 1000m. Elsewhere, mainly on S to E aspects, recent and older snow will remain well bonded and generally well stabilised. The avalanche hazard will be Low

Forecast Weather Influences

Sleety snow showers near summits from the early hours with rain or sleet at lower levels. Freezing near summit level at first becoming a little cooler later. Light to moderate SE winds becoming very light SW by the end of the day.

Comments

Relatively good snow cover on Carn Liath plateau on Friday. Some old cornice and avalanche debris below a few N to E aspects.
