

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 18/12/2020

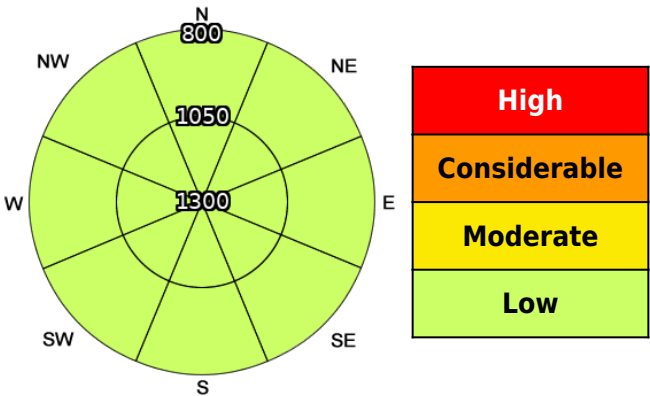

Avalanche Problems

Gliding Snow

Forecast Snow Stability & Avalanche Hazard

The snowpack will thaw at all levels. Although the snowpack is well bonded and stable in most locations there may be some potential for full depth glide avalanches on the steepest of slopes. Areas most likely affected would be where the snowpack has gained depth and it overlies terrain features such as smooth ground or rock slabs. The avalanche hazard will be Low.

Forecast Weather Influences

Strong to gale force Southerly winds throughout the forecast period. Rain is expected at all levels, this will be heaviest during the afternoon. The freezing level will be well above the summits.

Comments

Turning cooler over the weekend.
