

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Sunday 09/05/2021

Avalanche Problems

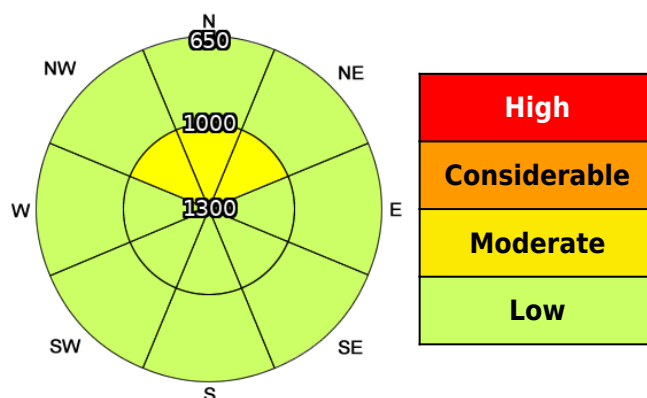

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will thaw and gradually consolidate through the period. Some instabilities will remain on North-West to North-East aspects above 1000 metres. These areas are not expected to be extensive, with the top of slopes and gullies being most affected. Although generally small, cornices above these aspects will be prone to collapse. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will be dry overnight and through the morning. Light rain is expected during the afternoon. The freezing level will be above the summits throughout. Strong winds will be from the South.

Comments

Forecast for mild conditions through the week.
