

**THE AVALANCHE HAZARD WILL BE MODERATE**

**Avalanche Hazard Forecast for Saturday 04/12/2021**

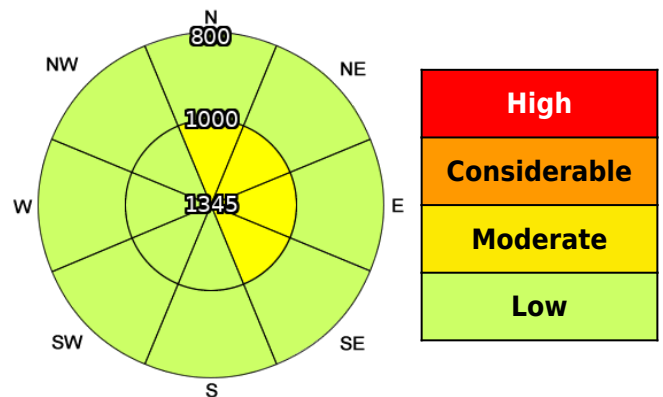

**Avalanche Problems**

**Wind Slab**

**Forecast Snow Stability & Avalanche Hazard**

Areas of unstable windslab will be deposited on top North through East to South-East aspects above 1000 meters. These areas will not be extensive and should be generally avoidable. The tops of gullies will be most affected. In other locations the snowpack will remain very shallow. The avalanche hazard will be Moderate.

**Forecast Weather Influences**

A significant band of snow will cross the area overnight. The freezing level will drop from about 900 meters to 600 meters where it will remain during the day. South-Westerly winds will veer to the North-West.

**Comments**

Snowpack remaining shallow other than the tops of the gullies.
