Torridon

Avalanche Hazard Forecast

Issued 09/12/2021

FOR PERIOD 18:00HRS Thu 09/12/2021 TO 18:00HRS Fri 10/12/2021

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 10/12/2021

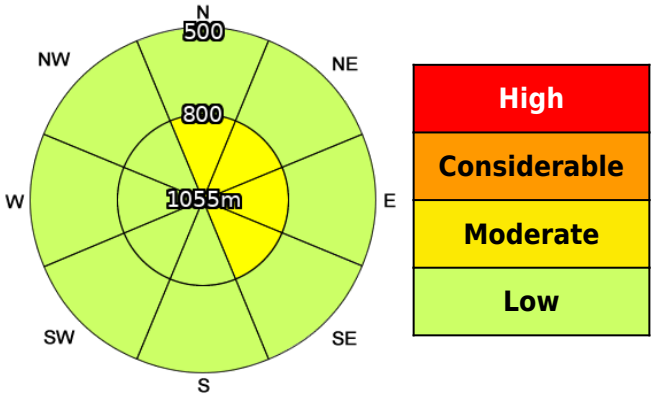

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Areas of moderately well bonded windslab will build in steep sheltered terrain, particularly overnight, and in some locations, adding to existing pockets of windslab. Most affected will be North through East to South-East aspects above 800 metres. Elsewhere, the snowpack will remain shallow with generally good stability. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will be cloudy with precipitation throughout the period, falling as snow above 400 metres overnight, above 600 metres by the end of the day. Fresh, generally West winds will gradually moderate during the day. The freezing level will lower overnight to around 400 metres, gradually rising to 600 metres by the end of the period.
