Torridon

Avalanche Hazard Forecast

Issued 17/12/2021

FOR PERIOD 18:00HRS Fri 17/12/2021 TO 18:00HRS Sat 18/12/2021

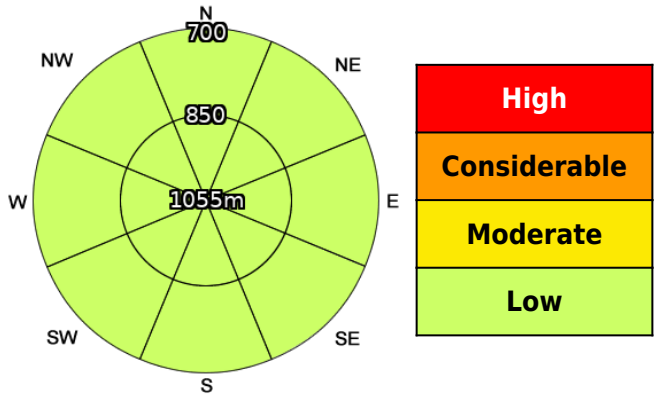

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 18/12/2021

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change. There will be a patchy, slowly thawing snow cover, most of which is avoidable. Little snow exists below 700 metres. The remaining snow is stable and consolidated, although with some surface softening expected. The avalanche hazard will be Low.

Forecast Weather Influences

Little change expected. It will remain dry with a light South-Westerly breeze and the freezing level will be well above the summits. There will be some summit cloud, particularly on the coastal mountains, which may disperse later.

Comments

The high pressure conditions will continue with a strong inversion at height, encouraging summit temperatures to lift higher than at low levels.
