Issued 18/12/2021

Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sat 18/12/2021 TO 18:00HRS Sun 19/12/2021

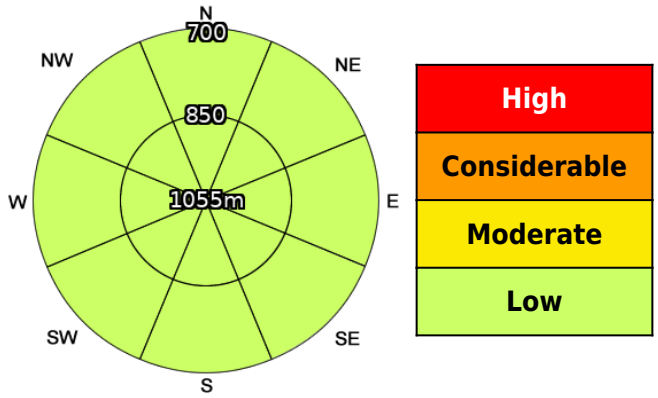
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 19/12/2021

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will continue to slowly thaw. Any remaining snow is confined to isolated patches in high corries or sheltered gullies. The snowpack will remain well bonded and stable. Little snow below 700 metres. The avalanche hazard will be Low.



Forecast Weather Influences

A dry day with light winds initially from the North before veering generally to the South-East. Freezing level well above the summits with inversion conditions maintaining cooler temperatures at lower elevations.

Comments

High pressure and temperature inversions set to continue.
