

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 19/12/2021

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The remaining snow will be confined to isolated patches, mainly above 800 metres on North through to Easterly aspects; these will remain re-frozen and stable. The avalanche hazard will be Low.

Forecast Weather Influences

Little change; high pressure will continue to affect the area. Cool and dry on the tops, with light variable winds.

Comments

Clear nights and high sublimation levels mean remaining snow patches are becoming hard underfoot. Poor runouts exist below any remaining ribbons of snow.
