Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Wed 22/12/2021 TO 18:00HRS Thu 23/12/2021

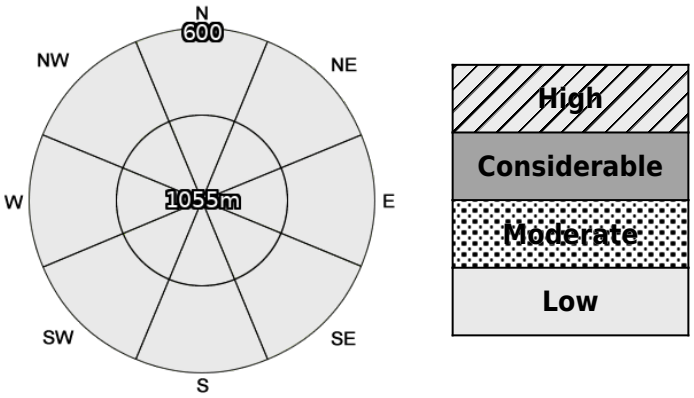

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 23/12/2021

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The very limited and patchy snowpack will remain firm and stable throughout. Minor accumulations of fresh snow are possible, most notably on sheltered Westerly aspects at higher elevations. The avalanche hazard will be Low.

Forecast Weather Influences

Limited outbreaks of rain, sleet and snow are forecast throughout the period. It will remain cold, generally freezing at most elevations. A light Easterly breeze overnight will gradually strengthen through the day, becoming strong by the end of the period.

Comments

Cold air remaining throughout the next period with fresh snow fairly widespread on Thursday evening becoming light and patchy overnight. It will feel very cold at summit levels tomorrow in the strong East wind.
