Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Fri 24/12/2021 TO 18:00HRS Sat 25/12/2021

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 25/12/2021

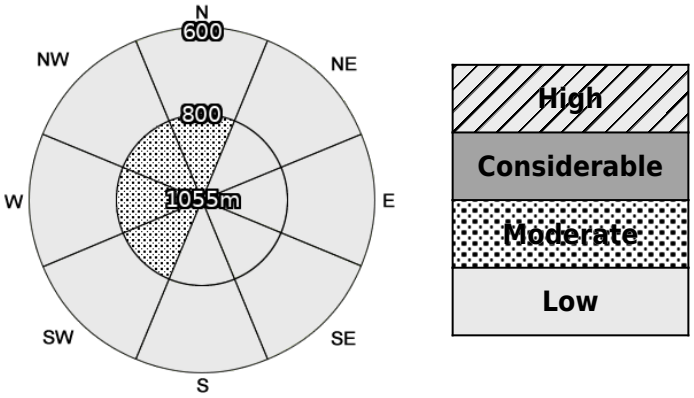

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

There will be a shallow covering of snow on all aspects, generally above 600 metres. Instabilities will remain in pockets of windslab in steep sheltered locations, on South-West, through West to North aspects, mainly above 800 metres. Most notably, terrain such as gully exits, coire rims and below ridge crests will be affected. Exposed patches of old snow will be firm and icy in places. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will generally be a dry and clear day. The strong East-South-East wind will persist throughout the period. The freezing level will be around 300 metres.

Comments

Although the weather and snow conditions are expected to be good over the weekend, it will feel bitterly cold in the strong generally Easterly airflow.
