Avalanche Hazard Forecast

Issued 27/12/2021

FOR PERIOD 18:00HRS Mon 27/12/2021 TO 18:00HRS Tue 28/12/2021

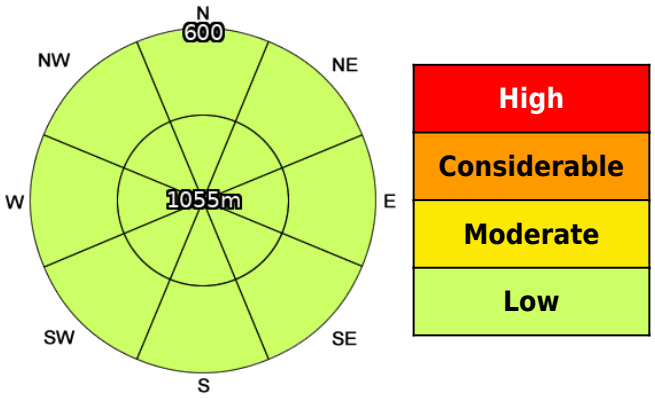
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 28/12/2021

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change; the generally shallow most recent snow cover will have good stability throughout, slowly thawing at lower elevations, refreezing with a surface crust at summit levels. Previously wind exposed terrain will remain scoured and areas of exposed old snow will be firm. No snow below 600 metres. The avalanche hazard will be Low.



Forecast Weather Influences

It will be largely dry and cloudy, but much brighter in the afternoon. The wind will be light and variable, generally South to South-West during the day and the freezing level will fluctuate around 800 metres.

Comments

Despite the higher freezing levels,, the ground will remain frozen and icy in places. Milder and changeable conditions from midweek.
