

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 01/01/2022

Avalanche Problems

Wet Snow

Forecast Snow Stability & Avalanche Hazard

Snowpack will remain moist and generally well bonded at all levels. The patchy snowpack will be present in wind sheltered places, primarily coire rims, gully exits, mainly on North-West through North to East aspects above 900 metres. The avalanche hazard will be Low.

Forecast Weather Influences

The freezing level will remain well above all summits in this area, continuing to produce mild conditions. Rain at all levels will allow the thaw to continue, this will be aided by very strong Southerly winds.

Comments

Mild, wet, and windy conditions for New Years day.
