Torridon

Avalanche Hazard Forecast

Issued 31/12/2021

FOR PERIOD 18:00HRS Fri 31/12/2021 TO 18:00HRS Sat 01/01/2022

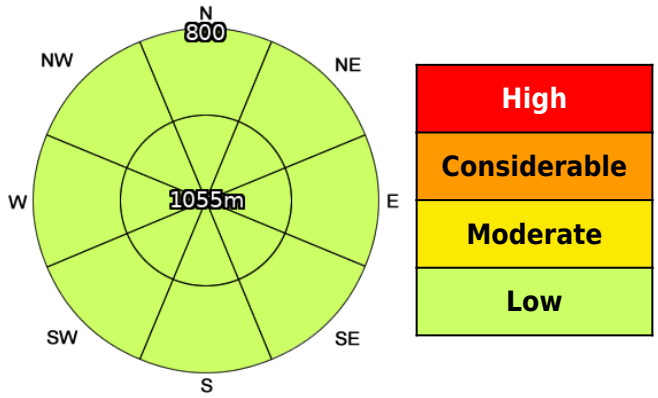
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 01/01/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The remaining patches of snow will continue to thaw at all levels. These snow patches will be soft but stable and will be found mainly on North to East aspects above 900m around corrie rims and in deeper natural depressions. The avalanche hazard will be Low.



Forecast Weather Influences

A mild day with rain at all levels. Strong Southerly winds overnight will increase to gale force during daylight hours. The freezing level will remain above summit height.

Comments

A stormy start to the New Year in prospect with freezing levels starting to lower on Monday.
