Southern Cairngorms

Avalanche Hazard Forecast

Issued 03/01/2022

FOR PERIOD 18:00HRS Mon 03/01/2022 TO 18:00HRS Tue 04/01/2022

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Tuesday 04/01/2022

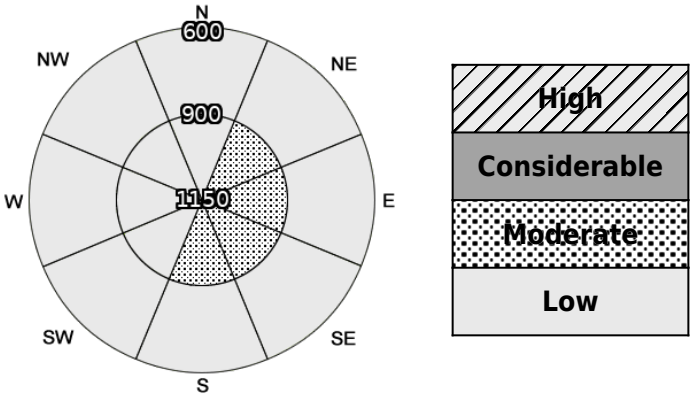

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

New snowfall with drifting will continue development of unstable windslab mainly on North-East through South-East to Southerly aspects above 900 metres. Sheltered terrain such as gully tops and scarp slopes will be most affected. Elsewhere, isolated drifts will build but general snow cover will be thin or scoured where exposed to the strong winds. The avalanche hazard will be Moderate.

Forecast Weather Influences

Remaining cold with light snow showers at all levels. Winds strengthening from the North-West, becoming severe gale force by the end of the afternoon.

Comments

A return to very cold and wintry conditions on the hills.
