Southern Cairngorms

Avalanche Hazard Forecast

Issued 04/01/2022

FOR PERIOD 18:00HRS Tue 04/01/2022 TO 18:00HRS Wed 05/01/2022

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Wednesday 05/01/2022

Avalanche Problems

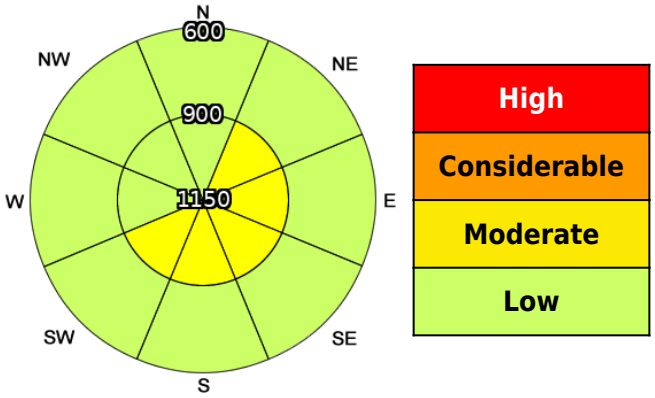

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

Unstable windslab will be present, mainly on North-East through South-East to South-West aspects above 900 metres. Wind sheltered locations, corrie rims, gully tops and scarp slopes will be particularly affected. Also here, fragile cornices will be starting to build. Otherwise, there will be a covering of dry unconsolidated snow with the odd deeper drift down to low levels. Exposed terrain will be scoured. The avalanche hazard will be Moderate.

Forecast Weather Influences

Continuing cold with light snow showers, mainly overnight at all levels. Winds, North-North-West throughout, gale to storm force overnight but expected to ease during the day.

Comments

Very much full Winter conditions on the hill again.
