Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sun 09/01/2022 TO 18:00HRS Mon 10/01/2022

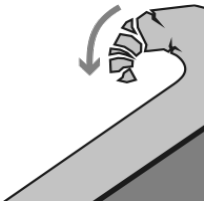

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Monday 10/01/2022

Avalanche Problems

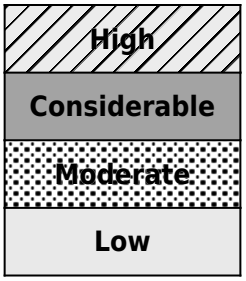

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

The remaining pockets of windslab on North to East aspects above 800 metres, predominantly in the tops of gullies and round corrie rims will become increasingly unstable as the freezing level rises well above the summits. Cornices will be prone to collapse. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will be dry overnight with the freezing level close to the summits. Light South-Easterly winds initially will increase in strength during the night becoming gale force Southerly by the middle of the day. By morning the freezing level will be well above the summits and showers will fall as rain at all levels during the day.

Comments

Not great for Monday but temperatures will begin to fall again by the end of the day.
