

## THE AVALANCHE HAZARD WILL BE LOW

### Avalanche Hazard Forecast for Friday 14/01/2022

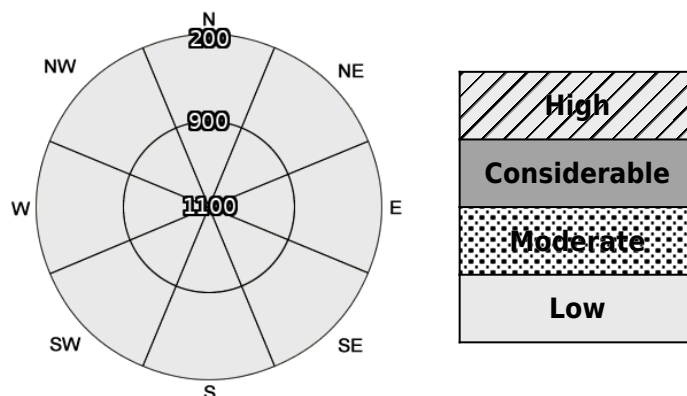

#### Avalanche Problems

Cornices

#### Forecast Snow Stability & Avalanche Hazard

Little change. Stability will remain generally good. The patchy cover on mainly North to Easterly aspects above 900 metres will further deplete. All cornices will remain suspect in the thawing conditions, with the additional hazard of falling rocks and ice in crag areas. The avalanche hazard will be Low.

#### Forecast Weather Influences

A moist and mild airflow will continue to affect the area. Strong West-South-West winds will ease South-Westerly overnight.
