Southern Cairngorms

Avalanche Hazard Forecast

Issued 14/01/2022

FOR PERIOD 18:00HRS Fri 14/01/2022 TO 18:00HRS Sat 15/01/2022

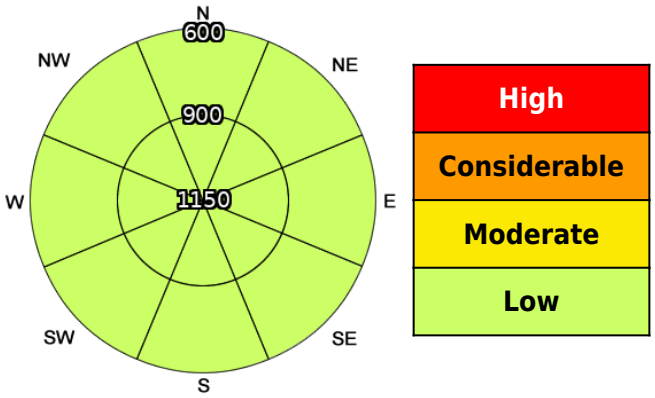

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 15/01/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The remaining snow will continue to slowly thaw but will be generally well bonded and stable on all aspects. Largest areas of snow will be found in North to East facing corries above 900 metres. Falling rock and ice from steep terrain will remain a hazard during prolonged thaw conditions. The avalanche hazard will be Low.

Forecast Weather Influences

A cloudy but dry day is expected. The freezing level will initially be over the summits but it will drop to around the summits by the end of the afternoon. Winds, strengthening from the South-West to become moderate in strength.

Comments

Freezing level will drop but only expected to be around the summits by the end of Saturday afternoon.
