

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 17/01/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Good stability in all locations. Some softening of older higher altitude snow patches will bring little change to the patchy, well bonded snowpack. The avalanche hazard will be Low.

Forecast Weather Influences

Temperature inversion conditions with low temperatures in glens and milder temperatures near summits. Moderate to strong West winds easing and becoming South-West later. No precipitation is forecast.
