Southern Cairngorms

Avalanche Hazard Forecast

Issued 17/01/2022

FOR PERIOD 18:00HRS Mon 17/01/2022 TO 18:00HRS Tue 18/01/2022

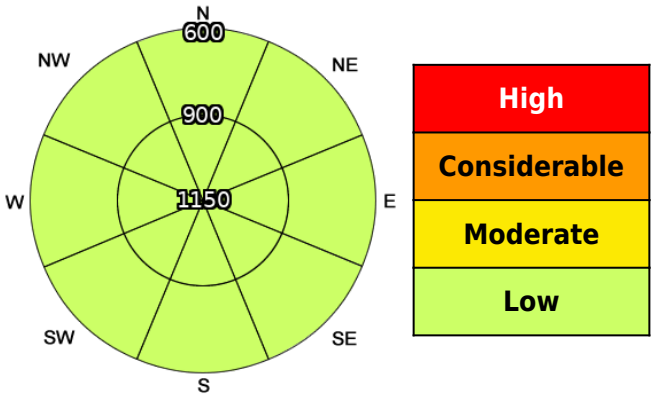

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 18/01/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

No change expected with well bonded and stable, patchy snow present. Very little snow below 900 metres. Some larger areas present above 900 metres in the steeper North and East facing corries, especially on the higher Cairngorm mountains. The avalanche hazard will be Low.

Forecast Weather Influences

Mostly dry with some very light rain forecast for the end of the period. Fresh South-Westerly winds overnight, increasing to strong South-South-Westely during the morning. The snowpack will remain mostly firm above 900m especially in shady slopes.

Comments

Old snow remained firm and icy in the shade today.
