

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 20/01/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Very shallow deposits of mostly avoidable, drifted snow will be present only in steepest, sheltered North to Easterly aspects, above 800 metres. Elsewhere the old patchy accumulations will be hard, re-frozen and stable. The avalanche hazard will be Low

Forecast Weather Influences

It will remain cold and mostly dry. The Freezing Level will lower to glens overnight, rising to around 600 metres as the day progresses. A North Westerly airflow will moderate and become Westerly at times.
