Southern Cairngorms

Issued 19/01/2022

Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Wed 19/01/2022 TO 18:00HRS Thu 20/01/2022

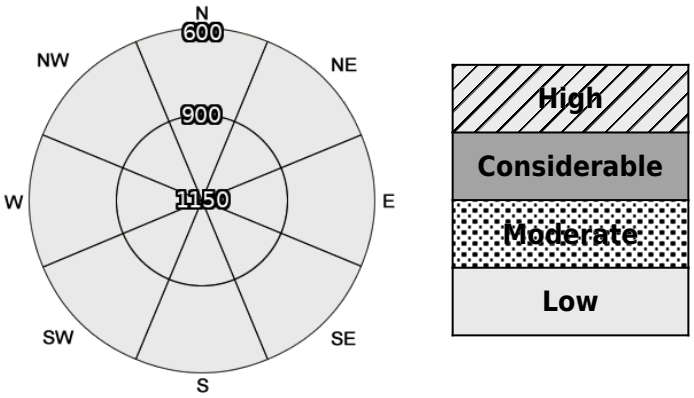

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 20/01/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change is expected. There will be a new dusting of snow around the summits with older patchy snow remaining hard and well bonded throughout. Greatest amounts of snow will be found on North to East facing aspects. The avalanche hazard will be Low.

Forecast Weather Influences

A cold night is expected, the freezing level will be around the glens but will rise during the day to around 800 metres. Very light snow showers are expected overnight but it will be dry during the day. Winds, moderate in strength, mostly North-Westerly.

Comments

New snowfall will not change the current situation.
